

Delta Stewardship Council
A California State Agency

Delta Plan Ecosystem Amendment Open House

In the Delta Reform Act, the goal of protecting, restoring, and enhancing the Delta ecosystem is coequal to the goal of providing a more reliable water supply for California. The Act also requires that both goals must be accomplished while protecting and enhancing the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place.

The Delta Plan is the Council's enforceable long-term management plan that governs actions and makes recommendations aimed at furthering the coequal goals. Adopted in 2013, the Delta Plan envisioned amendments to adjust to changing circumstances, as well as regular five-year reviews to ensure that it is making adequate progress to meet its goals and objectives.

Chapter 4 of the Delta Plan focuses on the Delta ecosystem. Protecting, restoring, and enhancing the ecosystem means successfully establishing a resilient, functioning estuary capable of supporting viable populations of native resident and migratory species. **The Ecosystem Amendment will:**

- Consider the past and future effects of **climate change and sea level rise**.
- Be informed by **best available interdisciplinary science**.
- Incorporate **adaptive management** practices; learn from our experiences.
- Identify desired **landscape-scale ecological outcomes**; learn from others.

Thursday, Feb. 22, 2018

5:00 p.m. - 7:00 p.m

Courtland Auditorium
146 Primasing Avenue
Courtland, CA 95615

**Join us at this
Open House to
hear more about
the science
informing the
development of
the ecosystem
amendment and to
provide your input.**
